

#### Yap Fiscal Year 2020

A Financial Statement Analysis Using Indicators of the Financial Health and Success and a Status Report of Audit Findings, Timeliness and Exception Resolution (A.F.T.E.R.) of the Government of <u>Yap</u> as of and for the Year Ended September 30, 2020

#### What Is The Performeter®?

- An analysis that takes a government's financial statements and converts them into useful and understandable measures of financial performance
- Financial ratios and a copyrighted analysis methodology are used to arrive at an overall rating of 0-10
- The overall reading is a barometer of Yap's financial health and performance

#### How to Use The Performeter®

- Use the individual ratios to identify financial warning signals
- Use the overall rating as a collective benchmark of financial health and success of Yap as a whole
- Use the comparisons to prior years to monitor trends in financial indicators

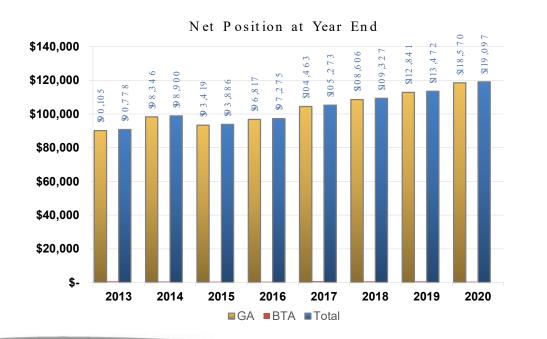

## Limitations of the Performeter®

- The Performeter® should not be used as the only source of financial information to evaluate Yap's performance and condition
- The analysis is an overall rating of Yap as a whole and not of specific activities, funds or units
- The Performeter® is based on Crawford & Associates' professional judgment and is limited as to its intended use

#### Change in Net Position

Did our overall financial condition improve, decline or remain steady over the past year?

Net position includes all assets of Yap. It is measured as the difference between total assets, including capital assets, and deferred outflows, netted against all liabilities, including long-term debt, and deferred inflows.

For the year ended September 30, 2020, total net position increased by \$5.6 million, or 5.0%.

Governmental activities (GA) net position increased by \$5.7 million, while business-type activities (BTA) net position decreased by \$104 thousand.

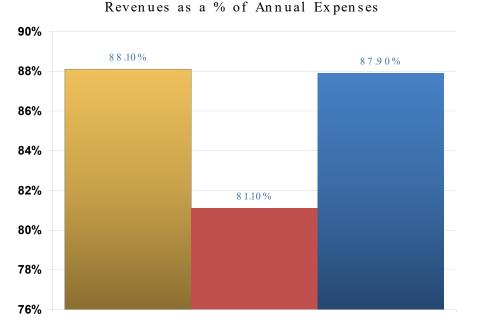

Only the governmental activities (gold colored bar) and total activities (blue colored bar) are legible on the chart due to the immateriality of the business-type activities (red colored bar).

							No. of Concession, Name

# Intergenerational Equity

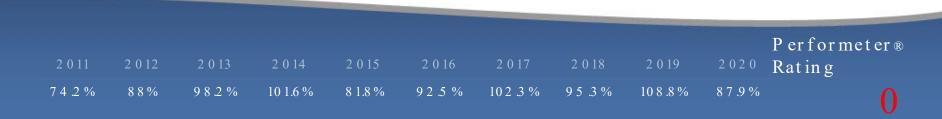

Who is paying for today's costs of services?

GA BTA Total

A measure of whether the government lived within its means in the measurement year, or was required to use prior year resources to fund a portion of current year costs, or shifted the funding of some of the current year costs to future periods.

For the year ended September 30, 2020, Yap funded 87.9% of their expenses with current year revenues. This represents a decrease in the ratio when compared to the ratio of the prior year, due primarily to a decrease of \$5.1 million in other revenues and an increase of \$2.6 million in expenses in the current year.

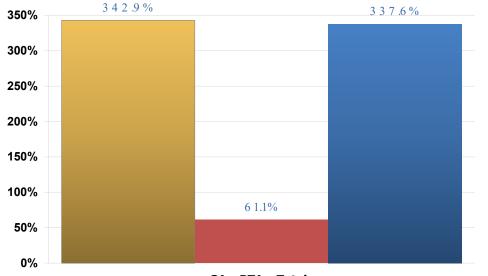

#### Level of Unrestricted Net Position

How do our total rainy day funds look?

Unrestricted Net Position as a % of Annual Revenues

GA BTA Total

The level of total unrestricted net position is an indication of the amount of unexpended and available resources Yap has at a point in time to fund emergencies, shortfalls or other unexpected needs.

For the year ended September 30, 2020, Yap's total unrestricted net position approximated 337.6% of annual total revenues, representing an increase from the ratio of the previous period.

The governmental activities had a 342.9% level of unrestricted net position, while business-type activities had a 61.1% level.

										Performeter® Rating
2011	2 0 12	2 0 1 3	2 0 14	2 0 1 5	2 0 1 6	2 0 17	2 0 1 8	2 0 19	2020	1.0
6 1.8 %	2 11.1%	2 10 .2 %	2 2 4 .8 %	277.4%	284.7%	2 2 2 .4 %	3 14 .3 %	286.6%	3 3 7 .6 %	

## Level of Unassigned Fund Balance

#### How does our carryover look?

Unassigned Fund Balance as a Percentage of Annual Revenues

The level of unassigned fund balance is an indication of the amount of unexpended, unencumbered and available resources Yap has at a point in time to carryover into the next fiscal year to fund budgetary emergencies, shortfalls or other unexpected needs. In this analysis, only the General Fund is considered.

PERFORMETER.

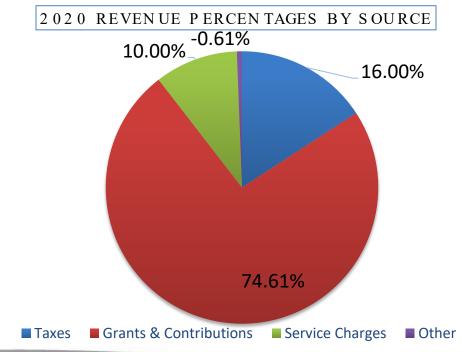

For the year ended September 30, 2020, Yap's unassigned fund balance of the General Fund was 198.7% of total general fund revenues. This is considered an excellent financial indicator and represents an increase from the ratio of the previous period.

2 0 11	2 0 12	2 0 13	2 0 14	2 0 15	2 0 16	2 0 17	2 0 18	2 0 19	2 0 2 0	Performeter® Rating
2 3 4 .6 %				2 5 9 .2 %						

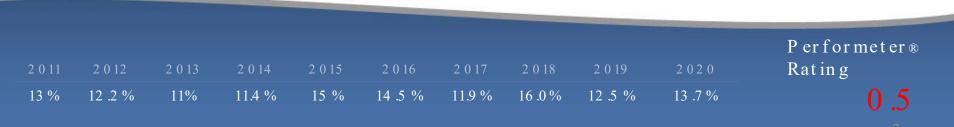

#### Revenue Dispersion

How heavily are we relying on revenue sources we can't directly control?

The percentage dispersion of revenue by source indicates how dependent Yap is on certain types of revenue. The more dependent Yap is on revenue sources beyond its direct control, such as revenue sharing taxes and from other governments such as grants, the less favorable the dispersion.

For the year ended September 30, 2020, Yap had direct control of 13.7% of its revenues. This ratio indicates Yap has some significant exposure, as do most insular governments, to financial difficulties due to reliance on non-controlled revenue (86.3%).

## BTA Self-Sufficiency

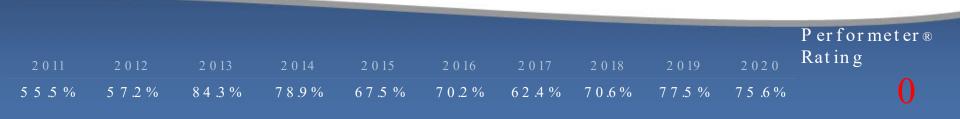

# Did current year business-type activities (BTA) pay for themselves?

Percentage of BTA Expenses Covered By BTA Revenues

The self-sufficiency ratio indicates the level at which business-type activities covered their current costs with current year revenues, without having to rely on subsidies or use of prior year reserves.

For the year ended September 30, 2020, Yap's total business-type activities were 75.6% self-sufficient, a decrease from the ratio of the prior year. This indicates the business-type activities still require a subsidy to cover costs of operations, the use of grant proceeds, or the use of unrestricted reserves to fund current year expenses.

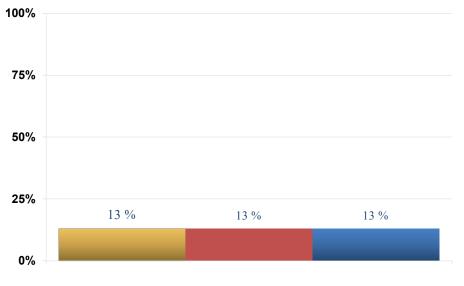

# Capital Asset Condition

# How much useful life do we have left in our capital asset condition ratio compared to the capital asset condition

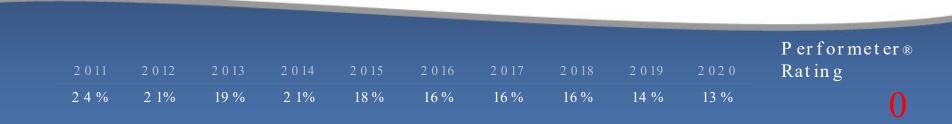

Percentage of Capital Assets' Useful Life Remaining

■GA ■BTA ■Total

The capital asset condition ratio compares capital assets cost to accumulated depreciation to determine the overall percentage of useful life remaining. A low percentage could indicate an upcoming need to replace a significant amount of capital assets.

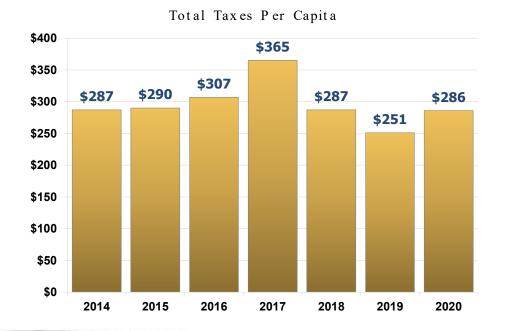

At September 30, 2020, Yap's depreciable capital assets amounted to \$125 million while accumulated depreciation totaled \$108 million. This indicates that, on average, Yap's capital assets have 13% of their useful lives remaining. This is an unsatisfactory financial indicator and could be indicative of a need for large amounts of capital expenditures in the near future. However, the ratio is consistent over the past few periods.

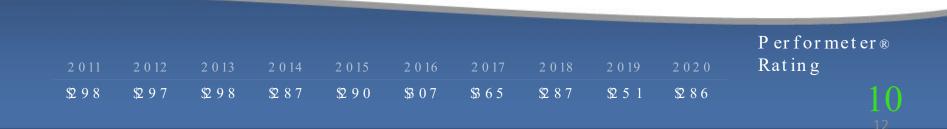

#### Financing Margin - Taxes

Will our citizens be willing to pay increased taxes for operations or capital improvements, if needed?

The financial ratio of taxes per capita is an indication of Yap's tax burden on its citizens and other taxpayers. The ratio includes all taxes, including gross receipts, income and other taxes.

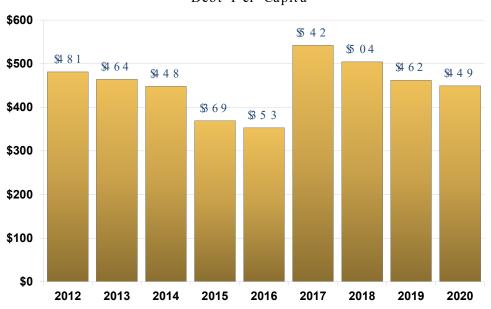

For the year ended September 30, 2020, total taxes amounted to \$3.25 million or \$286 per capita, which is an increase when compared to the ratio of the prior period. This represents a low tax burden on Yap's citizens when compared to other insular governments.

## Financing Margin - Debt

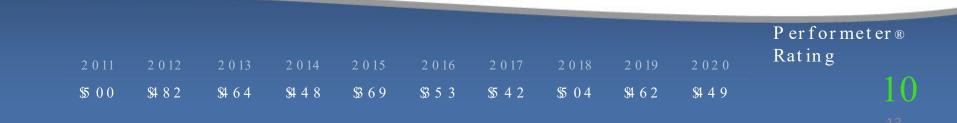

Will we be able to issue more debt, if needed?

Debt Per Capita

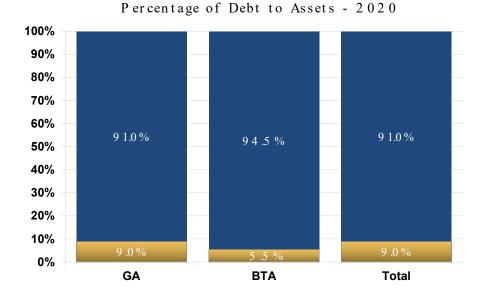

The financial ratio of debt per capita is an indication of Yap's debt burden on its citizens and other taxpayers. The ratio does not consider debt payable from enterprise activities or alternate revenues.

For the year ended September 30, 2020, Yap had approximately \$5.1 million of long-term debt or \$449 per capita. This represents a decrease from the ratio of the prior year and it is considered a relatively low debt burden on its citizens when compared to other insular governments.

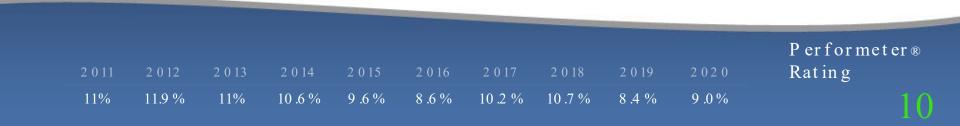

#### Debt to Assets Who really owns Yap?

Debt Assets Debt Free

The debt to assets ratio measures the extent to which Yap had funded its assets with debt. The lower the debt percentage, the more equity Yap has in its assets.

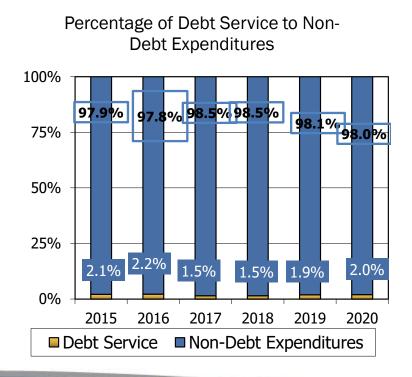

At September 30, 2020, 9.0% of Yap's \$130.8 million of total assets were funded with debt or other obligations. This is slight declined in the ratio from the prior year. However, it is still consider an excellent financial indicator and indicates that for each dollar of assets Yap owns, it owes 9 cents of that dollar to others.

#### Debt Service Load

How much of our annual non-capital budget is loaded with disbursements to pay off long-term debt

The debt service load ratio measures the extent to which Palau's non-capital expenditures were comprised of debt service payments on long-term debt.

For the year ended September 30, 2020, YAP's total non-capital expenditures amounted to \$24.3 million, of which \$484 (or 2.0%), were payments for principal and interest on long-term debt. In our model, this is considered an excellent ratio and indicates that for every dollar Yap spent on non-capital items, 2.0 cents of that dollar was used for debt service. Restatements for FY 2015 through FY 2017 have been made to this score and the overall score due to the impact of this ratio.

2 0 11	2 0 12	2 0 13	2 0 14	2 0 15	2 0 16	2 0 17	2 0 18	2 0 19	2020	Performeter® Rating
n/a	n/a	n/a	n/a	2 .1%	2.2 %	1.5 %	1.5 %	1.9 %	2 .0 %	

### Current Ratio

# Will our vendors and employees be pleased with our ability to pay them on time?

Current Assets Compared to Current Liabilities

The current ratio is one measure of Yap's ability to pay its short-term obligations. The current ratio compares total current assets and liabilities. A current ratio of 2.00 to 1 indicates good current liquidity and an ability to meet the short-term obligations. This ratio only includes the General Fund and the Enterprise Fund, which are Yap's primary operating funds.

At September 30, 2020, Yap had a ratio of current assets to current liabilities in these funds of 3.92 to 1. This indicates that Yap had just under four times the amount of current assets to pay current liabilities, and remains an excellent indicator of liquidity.

Performeter										
Rating	2020	2 0 19	2 0 18	2 0 1 7	2016	2 0 1 5	2 0 14	2 0 13	2 0 12	2 0 1 1
	3.92	4.70	3.2.2	3.15	3.46	3.10	3.29	3.70	3.57	7.15

### Quick Ratio

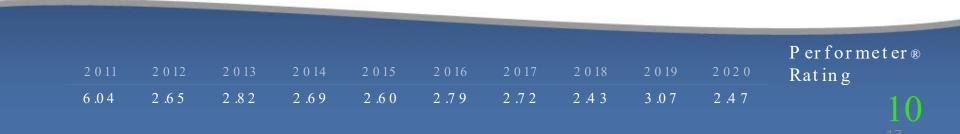

#### How is our short-term cash position?

\$29,000 \$24,000 \$19,000 \$15,829 \$15,744 \$14,000 \$9,000 \$6.383 \$6,414 \$4.000 \$85 \$1 -\$1,000 GA BTA Total Cash & Cash Equivalents Current Liabilities

Cash and Cash Equivalents Compared to Current Liabilities - 2020

The quick ratio is another, more conservative, measure of Yap's ability to pay its short-term obligations. The quick ratio compares total cash and short-term investments to current liabilities. A quick ratio of 1.00 to 1 indicates adequate current liquidity and an ability to meet the shortterm obligations with cash. This ratio measures only the General Fund and the Enterprise Fund, which are Yap's primary operating funds.

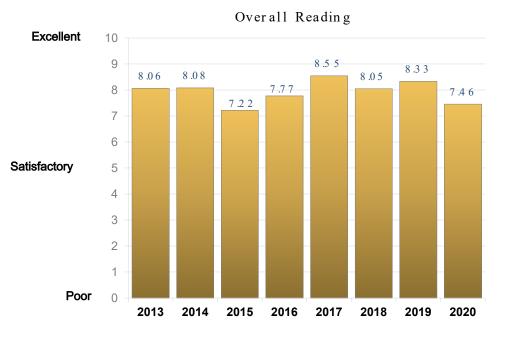

At September 30, 2020, Yap had a ratio of cash and cash equivalents to current liabilities of 2.47 to 1 in these funds. This indicates that Yap had almost two and one-half times cash and shortterm investments for every \$1 of current liabilities. This is considered an excellent indicator of liquidity but it does represent an decrease from the ratio of the previous period.

## Performeter Reading

How Was Our Overall Financial Performance?

For the 2020 fiscal year, the readings by ratio category were as follows:

Financial Position	10.0
Financial Performance	3.7
Financial Capability	6.8

The 2020 overall reading of 7.46 indicates the evaluator's opinion that the Government of Yap's overall financial health and performance improved during the year, and remains well above satisfactory.

Yap's overall unrestricted net position, the General Fund's level of unassigned fund balance, low tax and debt burdens per capita, an excellent debt-to-asset ratio, and excellent current and quick ratios are the primary reasons for the well above satisfactory rating.

Performeter Individual Ratios - Summary and Comparison to Prior Years

#### What is the A.F.T.E.R. Analysis?

 The A.F.T.E.R. Analysis is very simply an analysis of the status of audit findings, the timeliness of the submission of the audit and the resolution of certain audit exceptions, this analysis can be used to track a government's progress towards eliminating its most significant findings and exceptions, along with tracking the timeliness of submission to the Federal Clearinghouse.
