

THE PERFORMETER®

And A.F.T.E.R Analysis

A Financial Statement Analysis Using Indicators of the Financial Health and Success and a Status Report of Audit Findings, Timeliness and Exception Resolution (A.F.T.E.R.) of The Government of Guam as of and for the Year Ended September 30, 2007

Crawford & Associates, P.C Oklahoma City, Oklahoma

What Is The Performeter®?

- An analysis that takes a government's financial statements and converts them into useful and understandable measures of financial performance
- Financial ratios and a copyrighted analysis methodology are used to arrive at an overall rating of 1-10
- The overall reading is a barometer of GovGuam's financial health and performance

How to Use The Performeter®

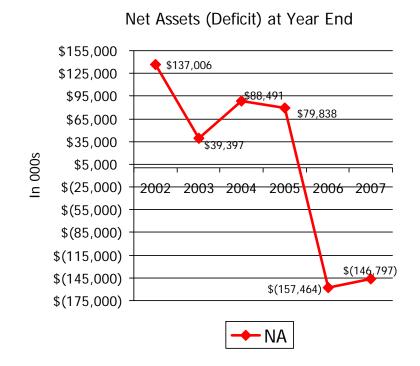

- Use the individual ratios to identify financial warning signals
- Use the overall rating as a collective benchmark of financial health and success of GovGuam as a whole
- Use the comparisons to prior years to monitor trends in financial indicators

Limitations of the Performeter®

- The Performeter® should not be used as the only source of financial information to evaluate GovGuam's performance and condition
- The analysis is an overall rating of GovGuam as a whole and not of specific activities, funds or units
- The Performeter® is based on Crawford & Associates' professional judgment and is limited as to its intended use

Change in Net Assets

Did our overall financial condition improve, decline or remain steady over the past year?

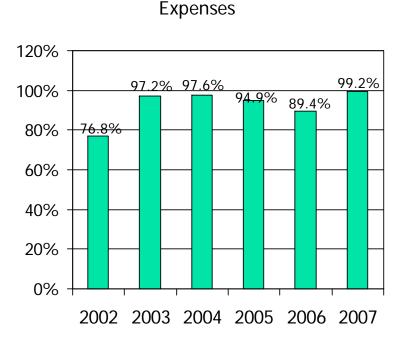

- Net assets include all assets of GovGuam, except for fiduciary funds held for the benefit of others. It is measured as the difference between total assets, including capital assets, and total liabilities, including long-term debt.
- For the year ended September 30, 2007, the total net assets deficit decreased by \$10.7 million or 6.8% from the prior year. This decrease in the deficit included the recognition as current year revenue a transaction that qualified as a special item (the downward adjustment of the earned income tax credit liability estimate) totaling \$17.2 million. Without considering this special item, the net assets deficit would have increased by \$6.5 million.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
-53.5%	-50.2%	19.8%	-9.8%	-345.7%	6.8%				

5

Intergenerational Equity Who is paying for today's costs of services?

Revenues as a % of Annual

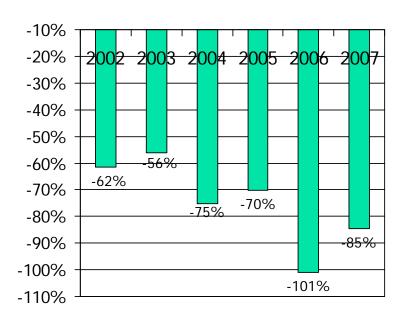

A measure of whether the government lived within its means in the measurement year, or was required to use prior year resources to fund a portion of current year costs, or shifted the funding of some of the current year costs to future periods. This measure also removes the effect of special items.

For the year ended September 30, 2007, GovGuam funded 99.2% of their current year expenses with current year revenues, which is a near excellent percentage. This percentage is an improvement from those reported in previous years.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
76.8%	97.2%	97.6%	94.9%	89.4%	99.2%				

Level of Unrestricted Net Assets How do our total rainy day funds look?

Unrestricted Net Assets (Deficit) as a % of Annual Revenues

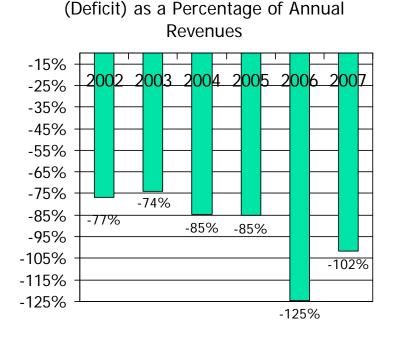

- The level of total unrestricted net assets is an indication of the amount of unexpended and available resources GovGuam has at a point in time to fund emergencies, shortfalls or other unexpected needs.
- For the year ended September 30, 2007, GovGuam's total unrestricted net asset **deficit** approximated 84.6% of annual total revenues.
- This is an improvement from the ratio in the prior year, and reverses a downward trend in the ratio that has occurred over several years. However, the special item mentioned on slide 5 (downward adjustment of earned income tax liability estimate) factored heavily in the decrease of the deficit.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
-61.5%	-56.1%	-75.2%	-70.1%	-100.9%	-84.6%				

Level of Budgetary Fund Balance

How does our budgetary carryover look?

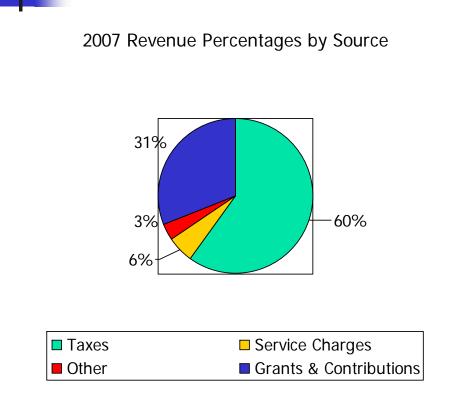

Budgetary Unreserved Fund Balance

- The level of budgetary unreserved fund balance is an indication of the amount of unexpended, unencumbered and available resources GovGuam has at a point in time to carryover into the next fiscal year to fund budgetary emergencies, shortfalls or other unexpected needs. In this analysis, only the General Fund is considered.
- For the year ended September 30, 2007, GovGuam's unreserved fund balance deficit of the General Fund was 101.8% of its annual revenues. This is a decrease of the deficit from the prior year, and reverses a trend of declining General Fund fund balance over the past few years.
- The large decrease from the prior year is due mainly to the recognition as revenue the special item that is referred to on page 5 of this analysis.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
-76.6%	-73.7%	-84.6%	-85%	-124.6	-101.8%				

Revenue Dispersion

How heavily are we relying on revenue sources we can't directly control?

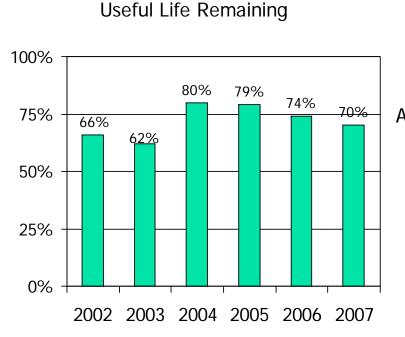

- The percentage dispersion of revenue by source indicates how dependent GovGuam is on certain types of revenue. The more dependent GovGuam is on revenue sources beyond its direct control, such as taxes tied to the I.R.S. codes and revenues from other governments such as grants, the less favorable the dispersion.
- For the year ended September 30, 2007, GovGuam had direct control over 35.6% of its revenues, including charges for services and some local taxes. This ratio indicates GovGuam has exposure, as do most governments, to financial difficulties due to reliance (64.4%) non-controlled revenues.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
36.8%	35.6%	40.1%	36.7%	37.4%	35.6%				

Capital Asset Condition How much useful life do we have left in our capital

assets?

Percentage of Capital Assets'

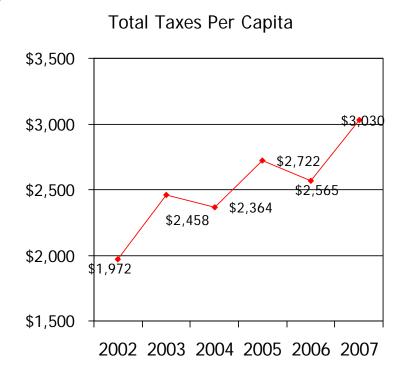

- The capital asset condition ratio compares capital assets cost to accumulated depreciation to determine the overall percentage of useful life remaining. A low percentage could indicate an upcoming need to replace a significant amount of capital assets.
- At September 30, 2007, GovGuam's depreciable capital assets amounted to \$916.8 million while accumulated depreciation totaled \$274.4 million. This indicates that, on the average, GovGuam's capital assets have 70% of their useful lives remaining. This is a near excellent financial indicator, although it does continue a decline from ratios of the most recent prior years.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
66%	62%	80%	76%	74%	70%				

10

Financing Margin - Taxes

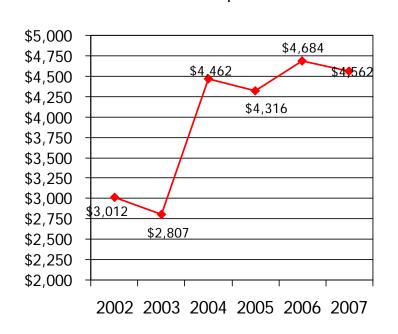

Will our citizens be willing to pay increased taxes for operations or capital improvements, if needed?

- The financial ratio of taxes per capita is an indication of GovGuam's tax burden on its citizens and other taxpayers. The ratio includes all taxes, including gross receipts, income and other taxes except for hotel taxes.
- For the year ended September 30, 2007, total taxes amounted to \$469.1 million or \$3,030 per capita. This indicates a relatively high tax burden when compared to other insular governments, and is an increase from the ratio of the prior year. With the exception of the current year, taxes per capita have remained relatively consistent over the last few years.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
\$1,972	\$2,458	\$2,364	\$2,722	\$2,565	\$3,030				

Financing Margin - Debt Will we be able to issue more debt, if needed?

Debt Per Capita

 The financial ratio of debt per capita is an indication of GovGuam's debt burden on its citizens and other taxpayers.

For the year ended September 30, 2007, GovGuam had \$706.2 million of long-term debt or \$4,562 per capita which is considered a high debt burden on its citizens when compared to other insular governments. For consistency purposes of the comparison to prior years, the provision for tax refunds liability (approximately \$258.3 million) is included in this calculation.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
\$3,012	\$2,807	\$4,462	\$4,316	\$4,684	\$4,562				

Pension Plan Funding Ratio

Will we be able to pay our employees when they retire?

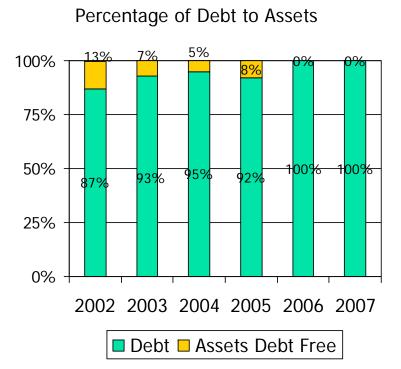

Plan Assets as a Percentage of

- The pension funding ratio compares the actuarial fair value of the pension plan's assets to the actuarial accrued liability for pension benefits. A percentage less than 100% indicates the plan is under-funded at the valuation date.
- At September 30, 2007 (based upon the most recent actuarial information from 2007), GovGuam's pension plan assets were 54% of the accrued pension benefit liability, indicating the plan was slightly more than half funded at the last valuation date. This is also consistent with the plan's funding in previous years, but is considered an unfavorable funding percentage.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
54%	48%	48%	50%	50%	54%				

Debt to Assets Who really owns GovGuam?

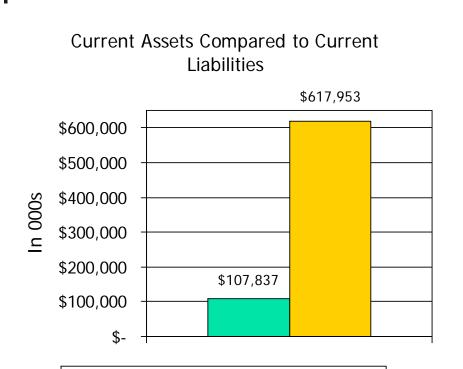

- The debt to assets ratio measures the extent to which GovGuam had funded its assets with debt. The lower the debt percentage, the more equity GovGuam has in its assets.
- At September 30, 2007, 100% (116.4%) of GovGuam's \$893.4 million of total assets were funded with debt or other obligations. This is an unfavorable financial indicator and indicates that for each dollar of assets GovGuam owns, it owes \$1.16 of that dollar to others. This is consistent with the ratio in the prior year.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
86.8%	93.1%	95%	91.5%	117.1%	116.4%				

Current Ratio

Will our vendors and employees be pleased with our ability to pay them on time?

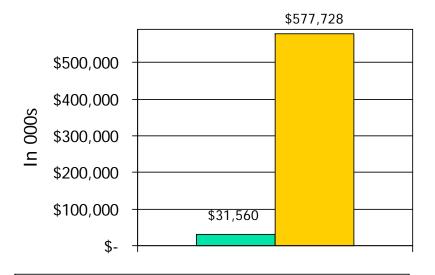

Current Assets Current Liabilities

- The current ratio is one measure of GovGuam's ability to pay its shortterm obligations. The current ratio compares total current assets and liabilities. A current ratio of 2.00 to 1 indicates good current liquidity and an ability to meet the short-term obligations. This measure is that of only the General Fund, the primary operating fund of GovGuam.
- At September 30, 2007, GovGuam's General Fund had a ratio of current assets to current liabilities of 0.17 to 1. This indicates that GovGuam has 17 cents of current assets to pay for every \$1 of current liabilities and is considered an unfavorable indicator of liquidity, and is consistent with the ratio of prior years.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
0.48	0.32	0.30	0.17	0.15	0.17				

Ouick Ratio How is our short-term cash position?

Cash and Cash Equivalents Compared to Current Liabilities

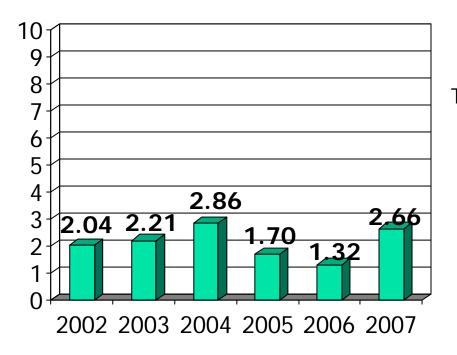

Cash & Cash Equivalents Current Liabilities

- The quick ratio is another, more conservative, measure of GovGuam's ability to pay its short-term obligations. The quick ratio compares total cash and short-term investments to current liabilities. A quick ratio of 1.00 to 1 indicates adequate current liquidity and an ability to meet the short-term obligations with cash. This measurement is only of GovGuam's General Fund, the primary operating fund.
- At September 30, 2007, GovGuam's General Fund had a ratio of cash and cash equivalents to current liabilities of 0.05 to 1. This indicates that GovGuam had 5 cents in cash and short-term investments available to pay every \$1 of current liabilities, and may be an indicator of cash flow difficulties.

2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
0.07	0.05	0.07	0.02	0.03	0.05				

Performeter® Reading

Overall Reading

- The 2007 reading of 2.66 indicates the evaluator's opinion that GovGuam's overall financial health and performance improved from the rating of the previous year, mainly to due the performance in the current year.
- The government's decrease in the net assets deficit, along with an improvement in the General Fund unreserved fund balance deficit and an improvement in intergenerational equity are the primary causes for the improvement. However, pension plan funding woes, the sizes of the unrestricted net assets deficit and the General Fund unreserved fund balance deficit, along with insufficient current and quick ratios continue to contribute to a low overall reading.

What is the A.F.T.E.R. Analysis?

The A.F.T.E.R. Analysis is very simply an analysis of the status of audit findings, the timeliness of the submission of the audit and the resolution of certain audit exceptions, this analysis can be used to track a government's progress towards eliminating its most significant findings and exceptions, along with tracking the timeliness of submission to the Federal Clearinghouse.
